# Modu-Con 6 Conveyor System

## Innovation on the Move, AMC's Fast Conveyor

AMC's Modu-Con 6 (MOD6) is a twin-strand, palletized conveyor system designed with the automotive, appliance, and electronics industries in mind. It is AMC's fastest conveyor with speeds up to 200 fpm (60 mpm), thanks to a pallet that travels at 2.5x the speed of the chain. This makes it ideal for low TAKT times and transfers. The MOD6 has pallet sizes ranging from 20" to 96" wide, and offers a plastic and steel chain. The maximum load/drive for the MOD6 is 3,080 lbs (1,397 kg), and offers a max load/roller of 8.4 lbs (3.8 kg) plastic. The maximum length/drive is 60 ft (18.5 m). It can be used in a myriad of locations, from a corrosive line to the most sensitive of electronics assembly.

### The MOD6 Can:

- **Lift & Locate** - Ability to lift and locate with elevators and shock-absorbed stops
- **Rotate** - Rotating capabilities allow for flexibility to work on multiple sides of a product at one station
- **Speed** - Get things done faster with speeds up to 200 fpm
- **Static-Sensitive** - Ability to handle static-sensitive products
- **Transfer** - Effortlessly transfer products from one MOD6 to another... or any other conveyor

### 3-Year Warranty

AMC offers the industry-leading 3-year manufacturer warranty on all AMC-manufactured products.

Automation & Modular Components (AMC) has been manufacturing reliable, low-maintenance conveyor systems for over 30 years. Our dependable systems have helped companies in over 25 industries across six continents produce goods faster, with more consistency, and is why we maintain such a strong reputation for quality, service, and customer satisfaction.
